

Have you Evolved?

The TRG Evolution System Simplifies your life!

- Easily installed retrofit retainer and gasket that replaces screw-on gaskets with snap-in gaskets.
- The gasket retainer creates the thermal break.
- With the Evolution System installed, future gasket installations require no tools.
- External gasket bellows are less vulnerable to abuse and easier to clean.

The Evolution System includes:

- Pre-drilled, cut-to-length gasket retainer
- Snap-in gasket
- Stainless steel phillips screws

Installing Evolution System is easy!

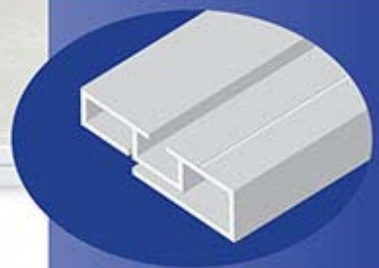

All you need is:

- Drill
- 1/8" drill bit (TRG Item: 99-T190-AG)
- Phillips screwdriver bit for your drill
- TRG's **Totally Radical GOO** (or food grade silicone)

To order: Measure the inside plate of the door or drawer. This can be done by lifting the screw-on gasket from the inside. You do not have to remove the gasket.

For more information please contact us.

Install TRG Evolution System in two simple steps:

Gasket Retainer

#1: Screw in the retainer

Snap-in Gasket

#2: Snap in the gasket
